# EFI Made Simple.

Performance Made Easy - **with a classic carb look!**

## **EZ-STREET™** EFI THROTTLE BODY INJECTION

Self-Learning Intelligence

No Laptop Required

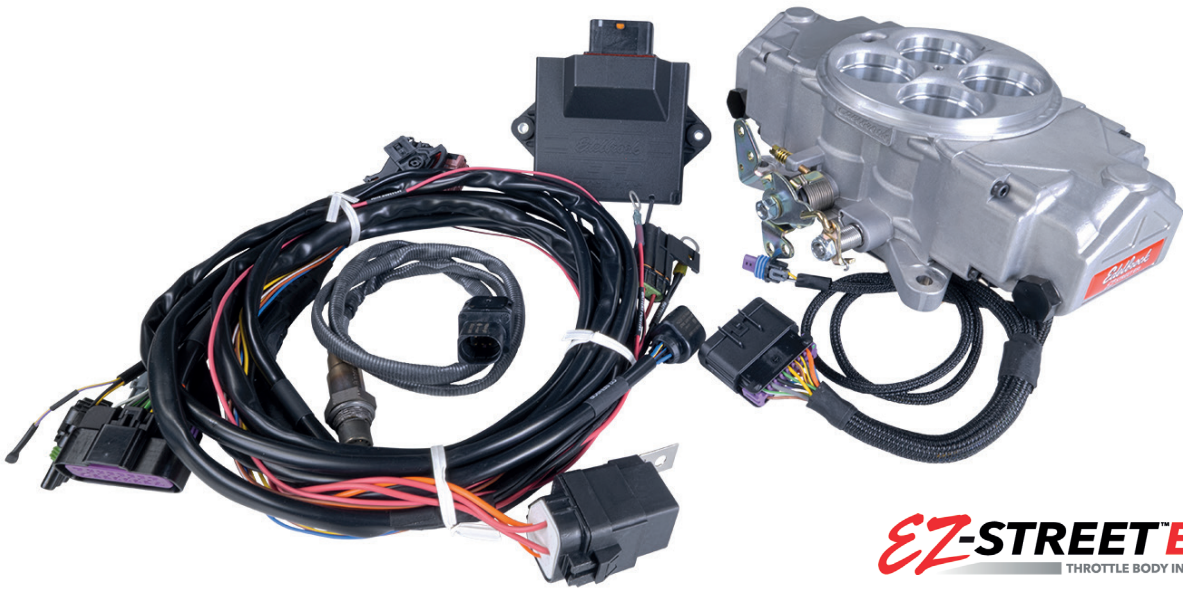

Bolt-On Simplicity

Simplest way to upgrade to modern fuel injection.

# EDELBROCK EZ-STREET™ EFI SYSTEM

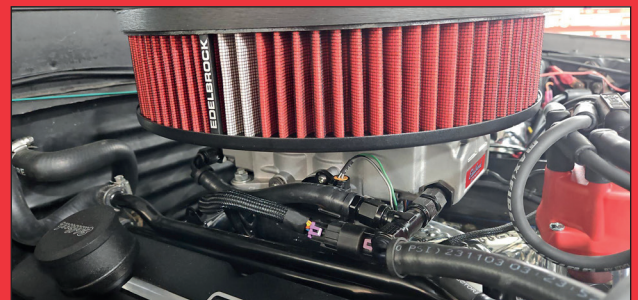

**EZ-STREET™ EFI**  
THROTTLE BODY INJECTION

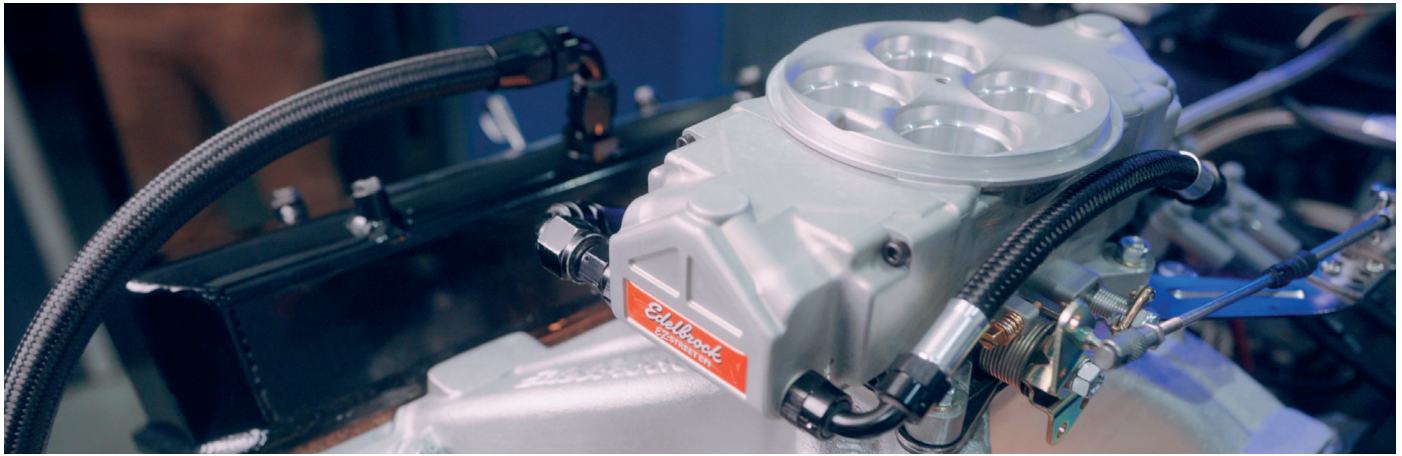

## Product Description

Engineered to provide an affordable and user-friendly upgrade for any V8 engine originally equipped with a carburetor, the EZ-Street EFI system seamlessly integrates cutting-edge technology with traditional styling. The four-barrel throttle body design mounts to any intake manifold with a standard 4150-style flange and accepts a traditional round air cleaner, giving builders a cosmetically appealing appearance that mimics a classic carburetor. Each unit arrives fully preassembled and pressure-tested, complete with integrated injectors, throttle position and manifold sensors, linkage, and a Bosch 4.9 wideband oxygen sensor. It also includes an ECU, high-quality wiring harness, and detailed installation instructions.

## Features & Benefits

- Self-tuning - no laptop required
- Simple 4-wire hookup
- Ready to run right out of the box with preloaded calibrations
- Compatible with most HEI distributors, ready-to-run distributors, and CDI boxes
- Supports up to 650 HP
- EZ-Street Bluetooth Tuner app available for free on the Google Play Store and the Apple App Store
- Integrated injectors, TPS, TMAP sensor, Fuel Pressure, and CTS sensors
- Annular-fuel-venturi distribution
- CAN communication
- Cosmetically appealing – looks like a traditional carburetor

## Why Choose EZ-Street EFI

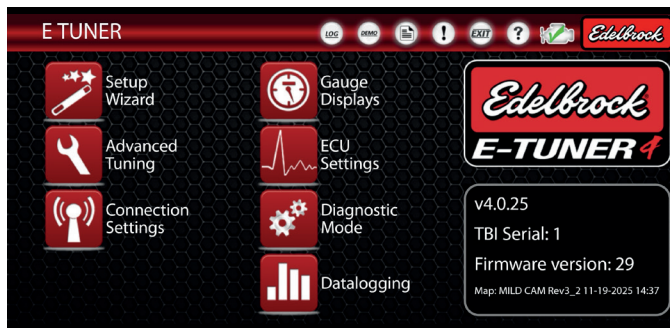

At its core, the EZ-Street EFI system features closed-loop, self-learning fuel technology that removes the guesswork from tuning. A calibration wizard makes initial startup simple, eliminating the need for custom tuning or a laptop. The included EZ-Street Bluetooth E-Tuner 4 App, available for both iOS and Android, allows users to configure the system, adjust settings, and monitor performance through intuitive preprogrammed dashboards. Data logging, fuel control, and dual electric fan management are all accessible directly from a smartphone or tablet, making this one of the easiest EFI systems to set up and operate.

Beyond fuel delivery, the EZ-Street EFI offers fully programmable ignition control, when paired with a Pro-Tuner distributor (available separately), enabling optimized performance and improved fuel efficiency. With an internal

coil driver and compatibility across most HEI distributors, ready-to-run distributors, and CDI boxes, the system eliminates the need for separate ignition modules.

Capable of supporting up to 650 horsepower, the EZ-Street EFI system combines advanced annular-fuel-venturi distribution with modern engine control technology to provide reliable, high-performance results in a simplified package.

With its blend of modern fuel-injection technology, easy installation, and classic carburetor styling, the EZ-Street EFI system represents the next step in affordable performance upgrades for automotive enthusiasts.

## Product Specifications

Choice of three calibrations combined with a true speed-density strategy and advanced closed-loop control offers great out of the box performance, even with big camshafts. Supports up to 650 horsepower. E-Tuner app offers easy setup, changes, and monitoring with crisp, clear graphics and easy navigation.

Application Summary: 4150-style throttle body Fuel injection for most domestic V8 engines. Optional spark control. Closed-loop self learn fuel strategy. Supports up to 650HP.

- Part Type: Fuel Injection System
- Manufacturer: Edelbrock
- Application: Application Specific
- UPC: 085347899531
- Series: EZ-Street EFI
- Flange Type: 4150
- Material: Aluminum
- Grade Type: Performance
- Supports: 650 HP
- Warranty: 24 Months
- Mounting Hardware Included: Yes
- Venturi Quantity: 4
- Airflow Rate: 1000 CFM
- Fuel Injectors Included: Yes
- Emissions Code: Pre-Polution-Controlled Vehicles
- Universal Or Specific Fit: Universal
